

# VISA GUIDE FOR STUDY ABROAD

A visa is an endorsement on a passport indicating that the holder is allowed to enter, leave, or stay for a specified period of time in a country. The documentation (very much like a sticker) is placed in your passport which indicates the terms of your entry, exit and duration abroad. The U.S. has different relationships with many countries, so each country's visa process for U.S. citizens can be different.

## Considerations:

- A passport, **valid 6 months beyond on the stay of the time abroad**, must be submitted to the country's consulate.
- The application submission process **may include having to appear in person**. It is recommended all students review a country's visa requirements 4-6 months prior to the program start.
- Students who are participating in back to back programs in different locations, should speak to the Study Abroad office as soon as possible about the logistics of applying for 2 different visas.
